Price:	1 Show	2 Shows	3 Shows
	\$380.00	\$555.00	\$730.00

### Short Description:

H2-Oh! Piccadilly Puppets' newest show explores our most precious resource in a fun and educational way! Large hand-puppets are used in the Australian folktale of "Tiddalick the Frog" and the Creek legend "Rabbit Plays Tug-of-War," which demonstrate that water is important to all cultures. The original shadow puppet piece, "The Adventures of Drip and Drop," shows the water cycle from the point of view of the raindrops. As the closing song says, "Everybody needs a little water!"

### Long Description:

#### Curriculum Standards:

S4E3 Students will differentiate between the states of water and how they relate to the water cycle and weather.

a. Demonstrate how water changes states from solid (ice) to liquid (water) to gas (water vapor/steam) and changes from gas to liquid to solid.

c. Investigate how clouds are formed.

d. Explain the water cycle (evaporation, condensation, and precipitation).

e. Investigate different forms of precipitation and sky conditions. (rain, snow, sleet, hail, clouds, and fog).

SS4CG4 The student will explain the importance of Americans sharing certain central democratic beliefs and principles, both personal and civic.

a. Explain the necessity of respecting the rights of others and promoting the common good.
